

GENIUS ERP FITS CUSTOM MANUFACTURING, FROM TOP FLOOR TO SHOP FLOOR

The only constant in custom manufacturing is change. Your competitiveness depends on how you handle it.

Genius ERP is built to manage all design-to-delivery steps on one connected platform. Our modules connect small and mid-size manufacturers, in real time.

Genius 
SOLUTIONS

INFORMATION:

Your manufacturing advantage.

Competitiveness in custom manufacturing comes down to your ability to handle variables, forecast and align your shop floor priorities. Every job is different, so having the information you need on hand is critical.

How do you handle the flow of job information?
Genius ERP handles it for you, and for your teams.

Management

- Establish a knowledge base for your production
- Lower operating costs and identify profit-leading opportunities
- Track quality, delivery times and overall effectiveness

Sales

- Genius CRM for sales pipeline management
- Order details released for procurement and production
- Customer portal with product configuration for inbound sales opportunities

Engineering

- Automatically convert CAD designs to Genius “double BOMs”
- Handle evolving BOMs, real-time modifications in-process
- Progressively release BOMs for advanced shop floor management

Finance & Purchasing

- Vendor portal and project specs
- Batch orders, monitor delivery and lead times
- Track historical costs, vendor quality

Shop Floor

- Real-time information and alerts
- Employee and machining tracking paired to work order
- On-the-fly changes applied across MRP

Operations

- Understand business based on true record of manufacturing
- Accounting information collated to work orders in your MRP
- Automated reports and real-time production dashboard

GENIUS ERP: THE RIGHT FIT FOR CUSTOM MFG
