

Genius ShopFloor

Get a complete view of your processes with a connected production floor.

Your ShopFloor is the heart of your business - make sure it is connected to your whole operation with Genius Shopfloor. Maximize your shop's coordination and collaboration and get your company firing on all cylinders.

Paperless 4.0

Do it all in one screen, from paperless access to information, time tracking, WIP tracking, live pick route, to work order completions.

Real time priority management

Create instantaneous alignment between upper management decisions and shop floor priorities.

Time tracking

Track work-in-progress cost and analyze the completion of planned work. Perform tasks on the go with our easy access (tablet ready) and flexible platform.

Make decisions that close communication gaps and build competitive edge

Key Features and Functionalities:

- Paperless 4.0
- Flexibility
- Perform tasks on the go
- Process automation (Iteration with MES and Smart Scheduling)
- Real-time data flow on labor, material, WIP tracking, work order locations, etc.
- Secured profile per employee and adapted to their tasks
- Online status management and job screening
- Real-time display of sorted and scheduled tasks based on material availability, previous job completion and inspections
- On-going up-to-date data
- Quality control
- Photo capture and storage
- Reduction of human errors
- Traceability on transactions and records

“A couple of years ago when I came in I realized that all of the operations were centralized in the office and that nobody was accountable on the floor. So I decided to make sure that people on the floor are accountable and are part of the solution.”

- *Alain Turgeon, Director, R&D, Continuous Improvement, and IT*
